## NEWS LETTER

GUZZLER GOES  
Bigger **2500** gallon !!

Latham Engineering are pleased to announce that from the 1<sup>st</sup> of January can now offer you & your customer the Slurry guzzler fully galvanized and much bigger, with 2500, 2200 / 1850 / 1550 gallon models. The major benefits of supplying the Slurry Guzzler FULLY GALVANIZED IS Obviously THE CORROSION FACTOR!

Although the painted slurry guzzlers have given many years of service, we believe that galvanizing the guzzler will be great value for money putting years on the life time of each machine. We have tried to keep changes to minimum, but with galvanizing some small changes have had to creep in.

We believe that the changes are for the better of the machines.

With the flat bar inner linkage now being replaced with a double acting hydraulic ram, to remove the risk of jamming doors/bent linkage. Also a new removable fill/spread change over plate has been added to assist with maintenance. With new 90mm removable braked stub axle fitted as standard. The SLURRY GUZZLER, we believe is now better value than ever.

## **POST DRIVERS**

Orders are being taken for POST DRIVERS. Some great deals are available on two or more machines, Please ring my self or Maurice for details.

## **YARD HOG**

As ever the YARD HOG is being extremely successful & a popular seller.

A large capacity collecting Bucket can now be supplied On request. Also I would like to bring to your attention the Bucket (handler) mounted option is always available.

Best regards

Andrew Latham.
